

The Sugar AI Engine

The SugarPredict AI engine drives business predictability and performance by continually analyzing your customer data, comparing it to a store of secure data sources, providing AI-driven predictions specific to your business. Insights are presented clearly offering your sales, marketing, and customer service teams the next-best action.

Accelerate Deals with Time-Saving, AI-powered Predictions

Understanding the current state of your business and health of your pipeline is essential, but what if you had the ability to see the future and predict what your business could be? That dream is now a reality. The Sugar AI engine, SugarPredict delivers exceptional business-critical predictions, even with limited or incomplete CRM data. Leveraging vast external data sources, SugarPredict surfaces insights unique to your business into **Sugar Market**, **Sugar Sell** and **SugarLive**, accelerating business growth by analyzing factors your data doesn't cover. Through these unparalleled predictions and sentiment analysis, businesses can make confident decisions and focus on high-priority activities across the business including marketing, sales, and customer service.

The SugarPredict AI engine's greatest value is its proven immediate time-to-value, successfully driving sales after activation and implementation. By applying deep learning models to both CRM data, customer and client interactions, lead activity and large quantities of data derived from external sources, SugarPredict provides a distinct advantage over modeling derived from CRM data alone—data that often is inaccurate or incomplete. SugarPredict algorithms identify signals with over 80% greater accuracy than rule-based approaches. Only SugarPredict analyzes both customer data in Sell, Market and SugarLive with externally sourced data covering millions of companies and contacts to accurately predict leads and opportunities most likely to convert successfully, as well as interaction sentiment analysis.

SugarPredict

Save Time ///

Save time and accelerate deals with accurate predictions—make better business decisions, manage risk, identify, and respond quickly to more opportunities.

Increase Accuracy ///

Accelerate deal velocity and maximize team productivity with accurate next-step advice backed by trusted metrics.

Implement Quickly ///

Place the power of AI into the hands of all your users on day-one. Boosting sales productivity and accelerate lead conversions and opportunity management.

Implement Quickly ///

Quickly understand the overall opinions of your customer, prospects and client interactions by automatically sorting the **sentiment** you can make faster and more accurate decisions.

Moreover, SugarPredict's design ensures that no-personally-identifiable information is exposed to users, ensuring the privacy and security of your customers' information.

SugarPredict AI-based predictions uses natural language processing (NLP) and automated machine learning (AutoML) across the Sugar product line, delivers these existing and future features:

- Identifying customers most likely to churn, giving precious runway to remediate and engage with customers strategically
- Predicting lead interest and likelihood to convert from lead scoring models
- Insight-driven forecasting and prescriptive guidance for higher quota attainment and sale close monitoring
- Recommending add-on products during the right phase of the customer journey increasing average deal size
- Ascertaining marketing attribution and contribution to closed business
- Improving customer engagement models through predictive case routing and contextual data in real time to empower customer service professionals
- Agent, Customer, Seller and Prospects sentiments are analyzed and given separate values. Making it easy for users to quickly benefit from the insights at-a-glance.
